

We tend to shop at Campmor, <http://www.campmor.com>
Here is information about the shelters and poles BIG uses.

8 ft. x 10 ft.
Coated Nylon
Tarp
No. 22217
Price: **\$32.99**

9 ft. x 9 ft.
Coated Nylon
Tarp
No. 22224
Price: **\$33.99**

10 ft. x 10 ft.
Coated Nylon
Tarp
No. 22226
Price: **\$38.99**

10 X10 would sleep 2 easily

10 ft. x 10 ft.
Versatile Nylon
Tarp
No. 22220
Price: **\$39.99**

10 ft. x 12 ft.
Coated Nylon
Tarp
No. 22218
Price: **\$40.99**

12 ft. x 12 ft.
Coated Nylon
Tarp
No. 22227
Price: **\$59.99**

This one has ties vs. grommets 10 X12 would sleep 3.

A 9 X10 fits one person, and 2 adults fit in a **10 X 12**. This is a versatile size to have. I think the troop has mostly 10 X12s and a couple 12 X 12s. Spacing of grommets is important for flexibility. If the ties last on the one 10 X 10 it could be an interesting tarp.

56 in. Steel Tent Pole

Item Number: 20320

THESE ARE ACTUALLY NOT THE POLES WE USE---THEY ARE STEEL AND NOT ALUMINUM. BUT YOU CAN GET THE IDEA FROM THE PICTURE.

Unfortunately, Campmor does not carry either the steel or the aluminum poles anymore (I last checked on 1-23-2004)

These are like the poles, but we only use 3 section and bought caps from OSH for the ground end. Actually, these are more like our original poles so they may be lighter but these don't look like they next like mine did. Other than nesting, I think these will be better. I had to cut the ones I bought since they claimed they no longer carried these. You want two 48" sections, so you will need to order two sets of 4.

We have also used hiking poles turned upside down.

For ground covers, we use emergency space blankets, as shown below. Campmor does not sell these: we get them at REI.

MPI SPACE ALL-WEATHER BLANKET

- Specifically designed to reflect and retain over 80% of radiated body heat
- The 4-ply laminated structure helps to form a "Perfect Barrier" capturing radiated body heat
- Prevents wind and moisture penetration through the material keeping the user warm and dry
- Has the capability to be used as an medical blanket, emergency shelter, windbreak, radar reflector or a large signal mirror or sunshade
- Full edge binding and reinforced grommetted corners
- Measures 60" x 84"
- Weighs 12 oz.
- Made in the U.S.A.
- Color: Red
